

# GO INTERNATIONAL

## Official Trade Mission to Italy

18 - 21 May 2026

### PROGRAMME

#### Recommended flights

##### Monday, 18 May 2026

Easyjet/EJU5438  
09h20 LUX Luxembourg  
10h35 LIN Milan-Linate

##### Thursday, 21 May 2026

Luxair/LG6998  
21h20 MXP Milan-Malpensa  
22h45 LUX Luxembourg

#### Important notice

- Each participant is personally responsible for her/his flight reservations. Due to the unpredictability of air travel, we highly recommend making a reservation that can be changed/refunded.
- Bus transfers are organised according to the proposed flights. Participants arriving individually will need to arrange their own transport to join the delegation.

09h30	<p>Visit of <u>Argotec Spacepark</u></p> <p><i>The center focuses on small satellite manufacturing, space systems engineering, and mission operations. Argotec Space is also known for developing technologies used in international programs, including collaborations with space agencies and companies involved in deep-space exploration.</i></p> <p><i>The facility combines research laboratories, clean rooms, and innovation spaces, making it a key hub for aerospace innovation and satellite development in Europe.</i></p>	<p>Via Luigi Burgo, 8 San Mauro Torinese</p>
09h30	<p><i>Visit – Track 2: Digital Technologies and Automotive Sector</i></p> <p>Visit of <u>Comau</u></p> <p><i>Comau is a global leader in advanced industrial automation and digital solutions, strengthened by Automha’s expertise in intralogistics and warehousing automation to deliver seamless, end-to-end systems. With over 50 years of engineering experience and an international presence, the company</i></p>	<p>Via Rivalta 30, 10095 Grugliasco (Torino)</p>

Version of 06.05.2026

*supports organizations of all sizes in building flexible, efficient, and sustainable production environments. Its capabilities span a wide range of industries, including automotive, e-Mobility, renewable energy, battery storage, hydrogen, logistics, aerospace, and pharmaceuticals, enabling adaptation to evolving market demands. Comau's portfolio integrates robotics, vision systems, artificial intelligence, and digital platforms to provide comprehensive manufacturing and logistics solutions.*

11h30	Transfer by bus to <u><a href="#">Politecnico di Torino – Main Campus</a></u>	Corso Duca degli Abruzzi 24, 10129 Torino
12h00	Business Lunch	Politecnico di Torino Rooftop Canteen
13h00	<p><b>Space/Defence:</b> Visit of the Department of Mechanical and Aerospace Engineering (DIMEAS) and laboratories (CubeSats, platform simulation and tests, Systems and Technologies for Aerospace Research Lab STARlab, Robotics lab, mechatronics lab: Shaker tests up to 1000 N)</p> <p><b>Automotive:</b> Visit of laboratories dedicated to batteries, power electronics, and energy conversion systems. Politecnico operates advanced experimental platforms for dynamic modeling and physical testing, as well as wind tunnel facilities used for aerodynamic optimization. In the area of autonomous vehicles, several laboratories focus on perception of technologies, sensors, embedded artificial intelligence, and control systems.</p> <p><b>Digital Technologies:</b> Visit of laboratories dedicated to cybersecurity, secure digital infrastructures, blockchain technologies, and resilient communication systems. Politecnico is also a key player in Industry 4.0 transformation, offering research and testing platforms for digital twins, IoT-enabled manufacturing, robotics, and advanced automation.</p>	
16h00	Bus transfer to Milan Malpensa	
21h20	Departure to Luxembourg	Airport of Milan-Malpensa
22h45	Arrival in Luxembourg	Luxembourg
